## PRODUCTS

Our company's products are used across numerous industries, including Pharmaceutical, Chemical, Automotive, Agricultural, Engineering, and Information Technology. Many repeat orders from esteemed businesses are in our order book, which speaks highly of our quality norms, rates, and after-sales support. After carefully analysing the needs of the client, the space available, the material to be stored, and the cost, we create and provide storage systems with standard measurements, along with customised ones according to the customer's requirements.

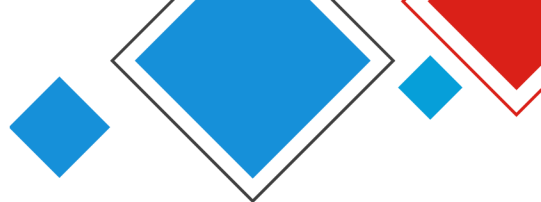

## PIGEON HOLE RACKS

Constructed from high-quality components, these drawer racks are available in different sizes to serve almost any application. However, the pigeonhole racks are usually used by busy retailers, who often require large quantities of products in quite small market locations. It offers the best storage resolution that can also be mixed with your storage space. If your inventory holds different types of items, these racks deliver a useful and profitable storage solution. It is ideal for enhancing picking operations while keeping good product visibility.

Product Type	Pigeon Hole Racks
Number of Shelve	7-10 (customized)
Height	1.8 – 3.0 Meter
Storage Capacity	50 kg per shelve
Surface Treatment	Powder Coated
Material	Mild Steel

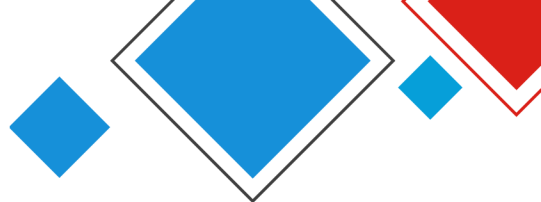

## LIBRARY RACKS

Storage racks consider an integral part of any library area. It is of utmost importance to store and, desirably, organise books. The suitable exhibition, ease of use and orderly sorting are the cornerstones of any library racking system. Simartech controls offer numerous kinds of rack systems in distinct sizes and a choice of colours to suit your needs.

Product Type	Library Racks
Height	5-8 Feet (Customized)
Mount Type	Free Standing
Surface Treatment	Powder Coated
Material	Mild Steel

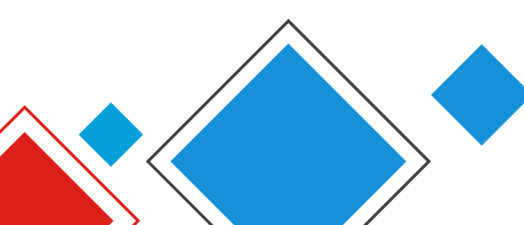

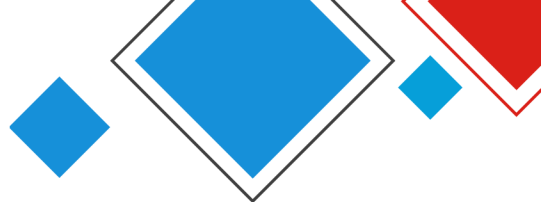

## STORAGE RACKS

Maximise your lab's efficiency with our high-performance Storage Units, engineered specifically for the demanding needs of medical laboratories. These units are designed to help you maintain a clean, organised, and compliant workspace, ensuring that all your materials and specimens are stored safely and within regulatory standards.

Product Type	Storage Racks
Mount Type	Free Standing
Surface Treatment	Powder Coated
Material	Mild Steel

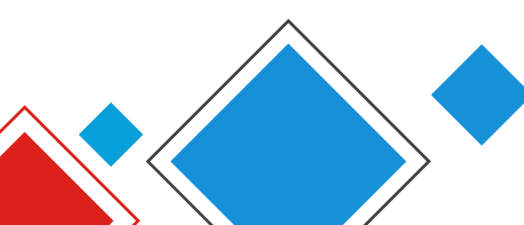

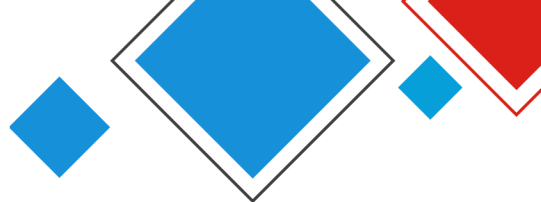

## SLIDE RACKS

Keep your laboratory efficient and your samples secure with our high-quality Rack. Engineered for precision and durability, these racks are essential for organising, drying, and storing microscope slides in clinical, research, and diagnostic labs.

Product Type	Slide Racks
Mount Type	Free Standing
Surface Treatment	Powder Coated
Material	Mild Steel

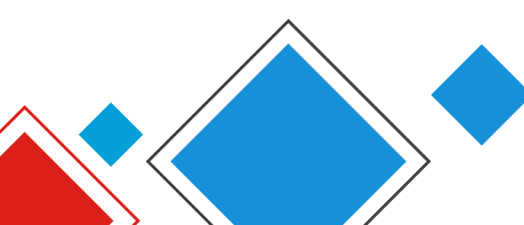

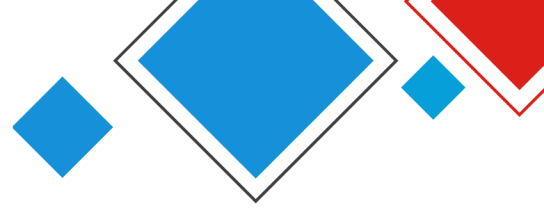

## FRAME WORK RACKS

This is the universal racking system used for repository of different products. In this system, all parts of racks are used to significantly remove weight capacity barriers. This system uses slotted angle frames rather than shelves, which greatly extend the payload capacity. The entire design of racks is equipped with nut bolts, making it manageable to form and dismantle the system as needed.

Product Type	Frame Work Racks
Height	8 ft onwards (customized)
Number of Shelves	3 onwards (customized)
Surface Treatment	Powder Coated
Material	Mild Steel

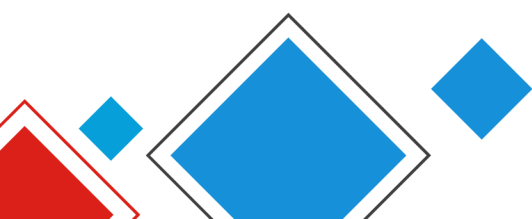

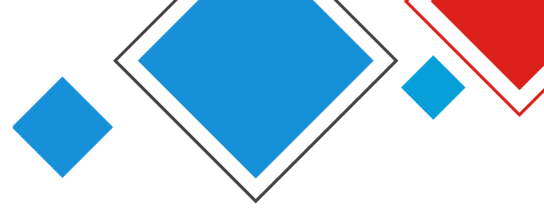

## SLOTTED ANGLE RACKS

These racks are the popular shelving solution in any industry. They are sturdy yet light-weight, making them an excellent choice for warehouses and other shelving necessities. Slotted Angle Racks are removable and can be easily transferred from one place to another by forklift. These types of racks have a good influence on management of products and warehouses. In addition, these racks increase productivity and improve storage space.

Product Type	Slotted Angle Racks
Height	6-8 Feet (Customized)
Storage Capacity	50-100 kg per layer
Layers per rack	3 onwards
Surface Treatment	Powder Coated
Material	Mild Steel

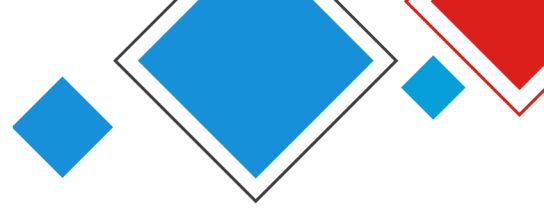

## SINGLE TIER MEZZANINE SYSTEM

With the help of highly capable and skilled professionals, we are able to offer a huge range of two-tier racks. This mezzanine rack is known for storing the highest quality materials. Correspondingly, this mezzanine rack offers a variety of customization options according to customer needs.

Product Type	Single Tier Mezzanine System
Height	5-12 feet (Customized)
Surface Treatment	Powder Coated
Material	Mild Steel
Size	Standard (Customized)

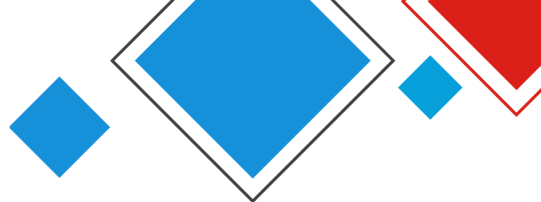

## MULTI TIER MEZZANINE SYSTEM

Multi-tier rack system is the perfect repository solution for manufacturing processes and spare parts. This system prevents the structural floor designs requirements and utilizes room height to increase floor space and storage capacity. It allows companies/industries to hold more products. Each and every rack level can be accessed by stairs, walkways, or ramps. Multi-tier rack system is the excellent storage and storage solution for high-roof spaces.

Product Type	Multi-Tier Mezzanine System
Height	Customized
Size	Standard (Customized)
Surface Treatment	Powder Coated
Material	Mild Steel

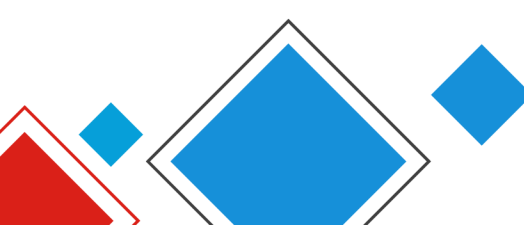

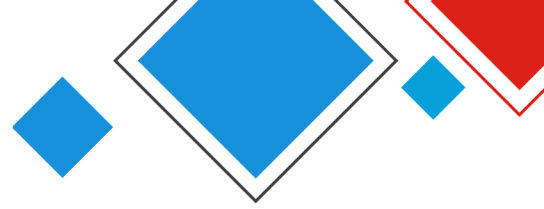

## SLOTTED ANGLE MEZZANINE SYSTEM

These mezzanines are the perfect key for expanding floor space in offices and industries. By making extra office space or extending your workspace, slotted angle mezzanine floors help expand manufacturing ability and enhance workplace working efficiency. Adding a mezzanine to a site, increases hold capacity and reduces operating costs. Installing a mezzanine with slotted angles is effortless, fast and inexpensive.

Product Type	Slotted Angle Mezzanine System
Height	5- 15 Meter (Customized)
Storage Capacity	1500-5000kg (Customized)
Shelve Thickness	1-2 mm (Customized)
Surface Treatment	Powder Coated
Material	Mild Steel

## HEAVY DUTY STORAGE SYSTEM

This type of system is especially designed for heavy load capacity. This type of system is quite manageable to install and dismantle as required for shifting, and much more. This is a fully customized system that can be made in a variety of colours along with a painted or powder-coated finish.

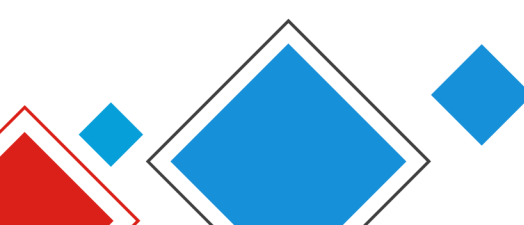

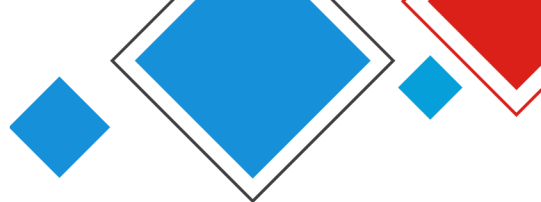

Product Type	Heavy Duty Storage System
Layers per rack	3 onwards
Mount Type	Free Standing Unit
Surface Treatment	Powder Coated
Material	Mild Steel
